PROFESSIONAL SUMMARY

Cloud Infrastructure and IT Support Engineer with 4+ years of experience delivering enterprise cloud solutions across AWS, Microsoft Azure, Oracle Cloud, and DevOps environments, with expertise in cloud deployment, migration, integration and automation. Strong background in Microsoft 365, Network administration, Fortinet network security, Systems administration, Virtualization, and identity management, ensuring secure and highly available IT infrastructure. Skilled in L2/L3 support, incident management, performance optimization, and proactive monitoring to maintain reliable operations. A collaborative professional with strong problem-solving, analytical thinking, communication, and troubleshooting skills, committed to delivering scalable solutions and aligning technology with business objectives.

SKILLS

- **Cloud & Infrastructure:** Microsoft Azure (AZ-900), AWS Cloud Practitioner, DevOps Fundamentals, Oracle Cloud Infrastructure (OCI), Container, Docker, Kubernetes, CI/CD
- **Networking & Security:** DNS, DHCP, VLANs, VPN, Firewalls, Network Security Groups (NSG), NAT Gateway, VPC, Fortinet Network Security, Zero-Trust Architecture
- **Microsoft 365 & Modern Workplace:** Exchange Online, Microsoft Teams, OneDrive, SharePoint Online, Entra ID, Intune, Microsoft Defender, Purview
- **Automation & Version Control:** PowerShell (Basic Scripting), Python, Git, GitHub
- **Identity, Endpoint & System Administration:** Active Directory, Group Policy, Windows OS Administration, Endpoint Management, IAM, Linux/Unix, Zero-Touch Deployment, Autopilot
- **Virtualization & Infrastructure:** VMware vSphere, Hyper-V, vMotion, Storage vMotion, DRS, Cluster Management, Storage Management (SAN/NAS), Backup & Recovery, Veeam, Patching
- **Nexthink & Monitoring:** Nexthink DEX (Dashboards, Investigations, Campaigns, Alerts, Experience Metrics, Reporting & Insights), Log Analytics, Root Cause Analysis
- **IT Service Management (ITSM / ITIL):** Incident Management, Change Management, Problem Management, ServiceNow, SLA Reporting, L2/L3 escalation handling
- **Client & Business:** Pre-Sales, Post-Sales, Solution Walkthroughs, Use-Case Mapping, Customer Enablement, User/Admin Training, Presentations, Technical Documentation

PROFESSIONAL EXPERIENCE

Misdaqia Technologies (Dubai, UAE)

AUG 2025 – JUL 2026

Cloud Infrastructure and IT Support Engineer

- Delivered cloud, Microsoft 365, endpoint, security, and on-premises infrastructure solutions for internal teams and external customers, improving service reliability and operational support.
- Integrated Nexthink with Microsoft Entra ID and ServiceNow, enabling identity-aware digital employee experience workflows and stronger alignment between endpoint insights and IT service management.
- Administered Microsoft 365 and Exchange Online security controls, implementing anti-spam and anti-spoofing protections to strengthen email security and reduce exposure to malicious messages.
- Configured Microsoft Defender threat protection policies and security controls to improve endpoint and identity threat protection across Microsoft 365 environments.
- Implemented Microsoft Purview data protection capabilities, including Data Loss Prevention (DLP) policies and sensitivity labels, to support information protection and governance requirements.
- Used Microsoft Intune and Windows Autopilot for zero-touch device deployment, application installation/uninstallation, configuration, and device-compliance enforcement, reducing manual endpoint administration.
- Implemented Zero Trust security principles through identity-based access, Conditional Access, least-privilege RBAC, device compliance, and continuous security controls.
- Provided L2/L3 IT and cloud support for external clients, troubleshooting endpoint, Microsoft 365, cloud, network, and infrastructure incidents while maintaining SLA-focused service delivery.
- Served as a technical consultant for Nexthink DEX, delivering platform configuration, dashboards, investigations, campaigns, alerts, experience insights, reporting, use-case mapping, and customer enablement.

- Managed incidents, service requests, changes, and escalations through ServiceNow, coordinating resolution activities and maintaining SLA compliance.
- Monitored system health and network performance using Azure Monitor and Nexthink DEX; performed root cause analysis (RCA) for complex L2/L3 infrastructure and network incident
- Supported Azure and OCI infrastructure, including VNets/VCNs, NSGs, VPN Gateways, routing, monitoring, and L2/L3 troubleshooting across cloud and hybrid environments.
- Supported cloud migration and infrastructure modernization initiatives, contributing to requirements gathering, implementation, troubleshooting, documentation, and post-deployment support.
- Contributed to RFP/RFI responses, technical solution discussions, customer presentations, architecture documentation, and knowledge-transfer sessions, helping bridge customer requirements with practical technical solutions.
- Partnered with sales and customer-facing teams to identify technical opportunities, recommend improvements, and support account growth, renewals, and expansion discussions.

DXC Technology (Bangalore, India) **Infrastructure Service Analyst**

SEP 2021 - MAR 2025

- Led a large-scale VMware infrastructure upgrade program for Deutsche Bank by migrating 25,000+ virtual machines and 585+ clusters from vSphere 6.5 to 7.0, enhancing system performance and stability.
- Provided L2/L3 support for virtual machines and performed routine patching and server health checks.
- Handled service requests and incident tickets related to VM issues, resource allocation, and access control.
- Executed vMotion and Storage vMotion operations to ensure seamless VM migrations with zero downtime
- Participated in CAB meetings and change approvals in line with ITIL processes.
- Managed end-to-end change planning, approvals, and execution, ensuring all migration activities adhered to ITIL standards and organizational SLAs.
- Orchestrated VM transitions from legacy HPE C7000 chassis to HPE Synergy frames using vRO.
- Configured VLANs and port groups on vDS in the target environment to maintain consistent network policies.
- Implemented Raw Device Mapping (RDM) for specific VMs requiring physical disk access.
- Performed unmasking operations post-migration, eliminating dual-zoned setups and improving storage consistency.
- Used Veeam Backup for backup and recovery operations, supporting data protection & business continuity.

ACHIEVEMENTS & AWARDS

- **FY24, Q2 DXC Champs Award:** Recognized for excellence in cloud infrastructure delivery - DXC Technology.
- **H2 FY23 DXC Collaborators Award:** Recognized for outstanding teamwork and collaboration - DXC Technology.

CERTIFICATIONS

- **Fortinet NSE 2 Certified in Cybersecurity** - Fortinet
- **Nexthink Digital Employee Experience Platform Certified** - Nexthink
- **Oracle Cloud Infrastructure 2024 Certified AI Foundations Associate** - Oracle University.
- **DevOps Engineer Certification** - ExcelR Solutions.
- **VMware Certified Professional 7.0 Data Center Virtualization** - VMware.
- **Google Cloud Certified Associate Cloud Engineer** - GoogleCloud.
- **Lenovo AI Laptops and Workstations Sales and Technical Sales Certified** - Lenovo

EDUCATION

Jain University, Bangalore
MBA in Information Technology, CGPA: - **8.92**

NOV 2022 - SEP 2024

Kristu Jayanti College, Bangalore
Bachelor of Computer Applications (BCA) – UAE Attested, CGPA: - **7.74**

JUN 2018 - JUL 2021
